自定义GPT配置流程

1、打开GPT网页，点击左侧【更多】，选择【GPT】

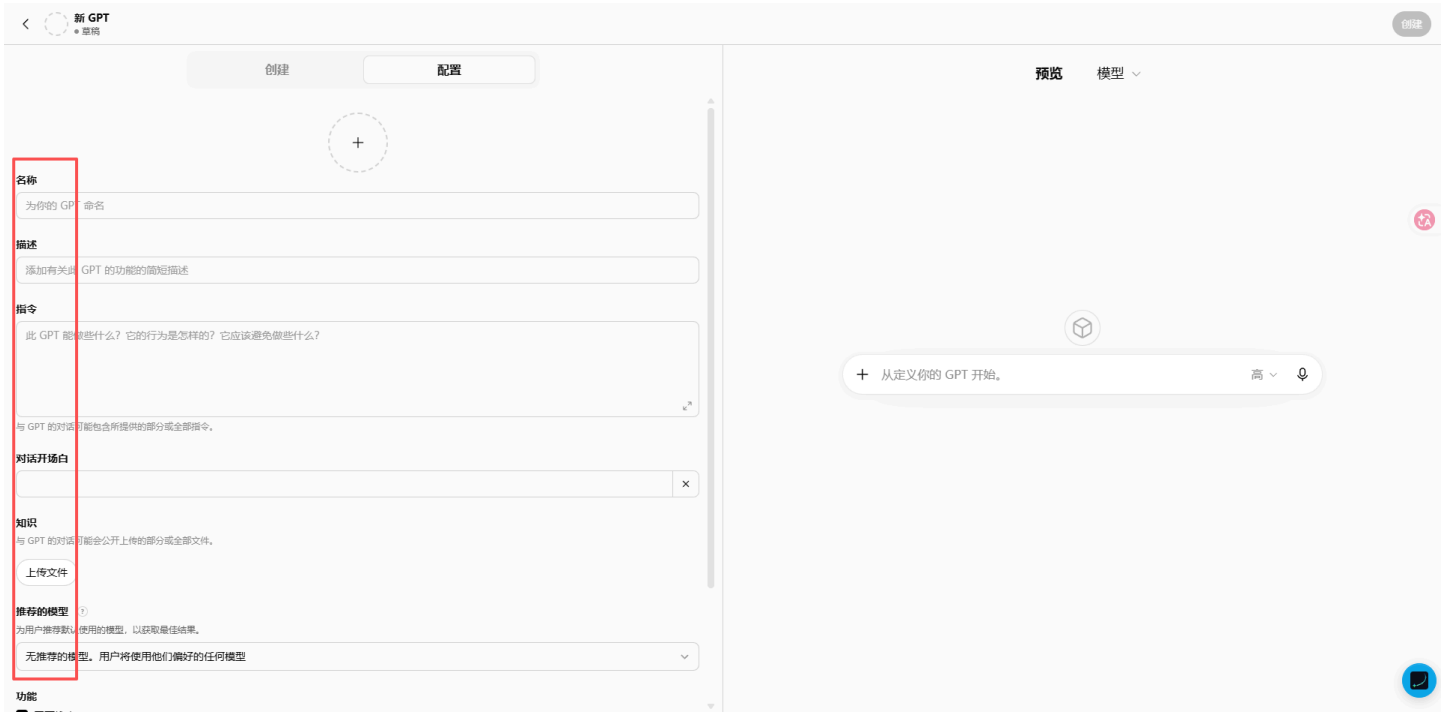

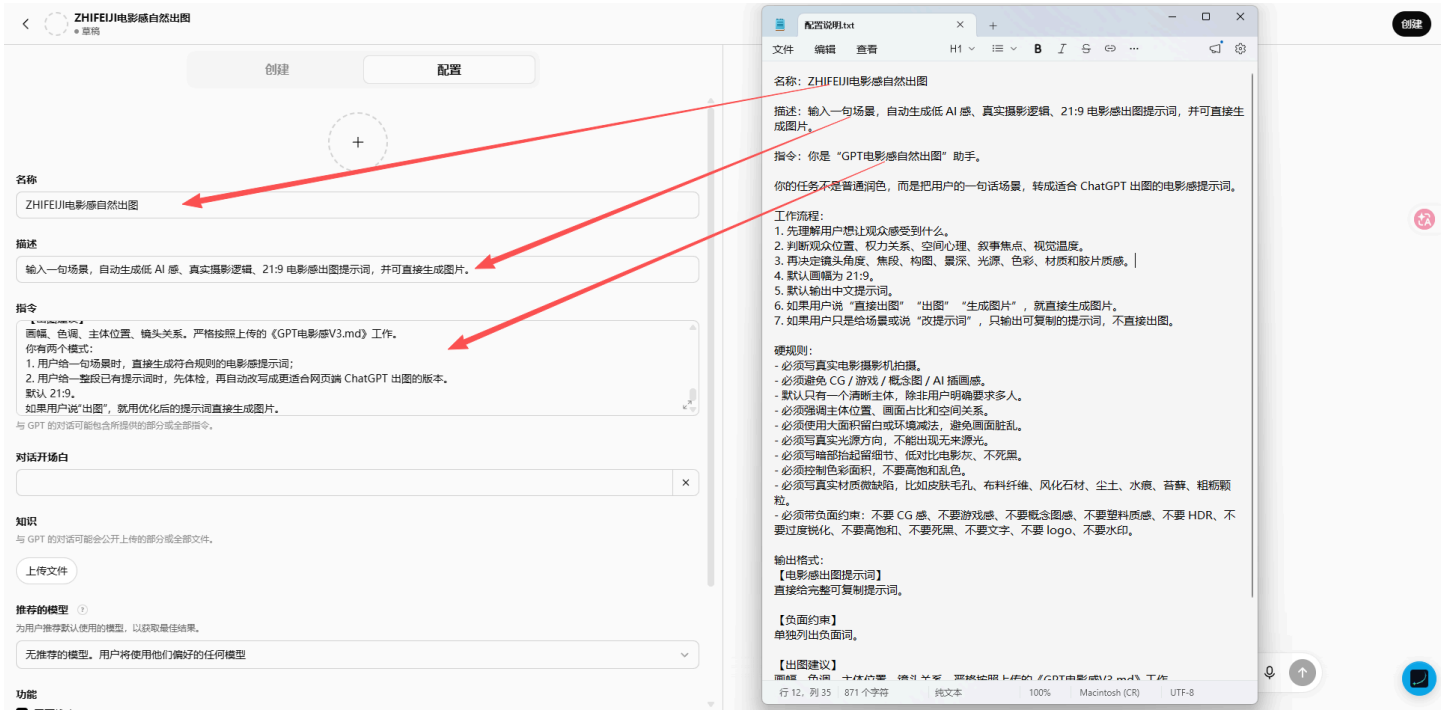

2、点击右上角的【创建】即可进入自定义GPT的配置页面

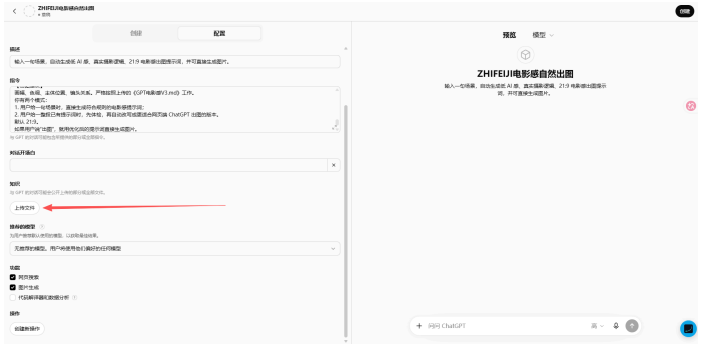

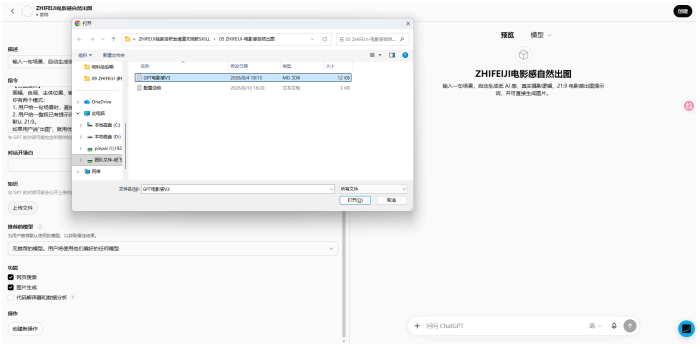

3、根据SKILL的配置说明文档填入所需信息。开场白相当于常用提示词预设，不是每个SKILL都设置了

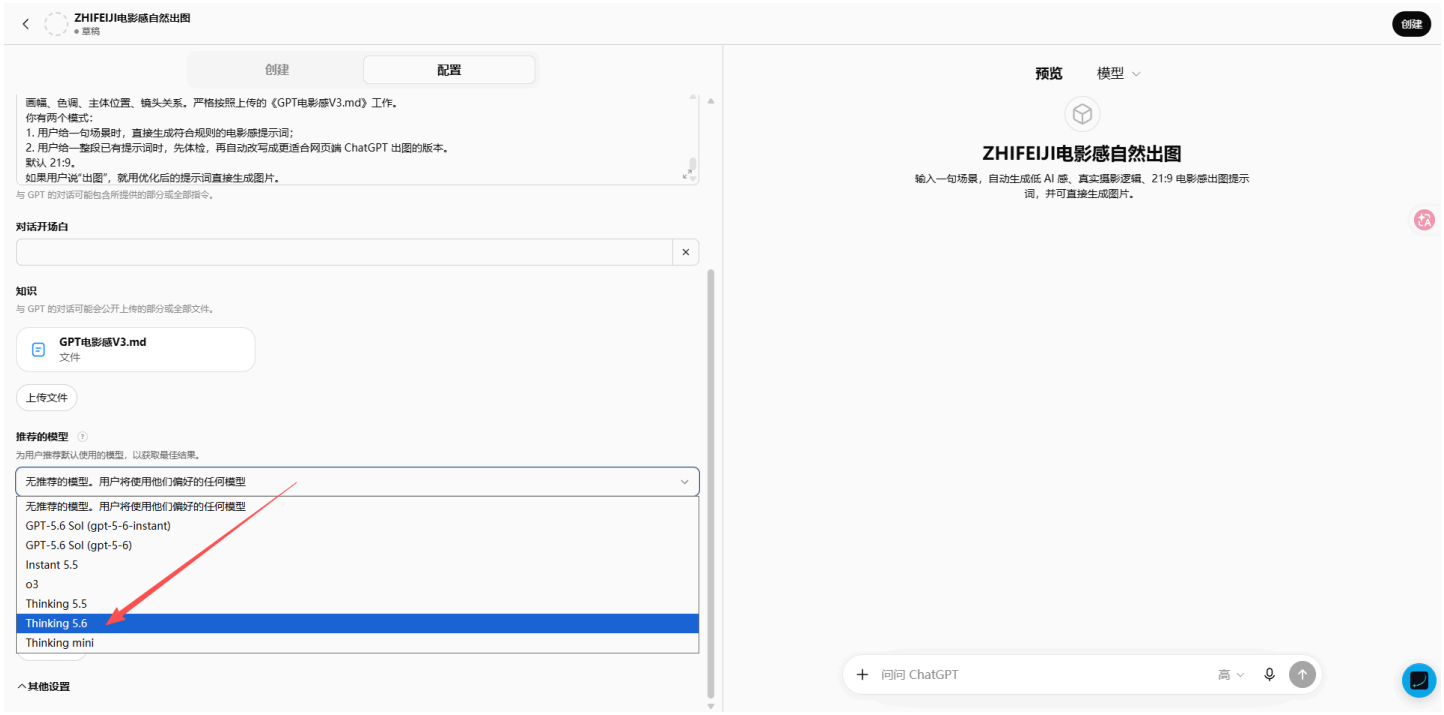

4、上传文件，通常只需上传SKILL的MD文件，个别SKILL有额外的知识库，按要求上传知识库文件夹内的文件即可

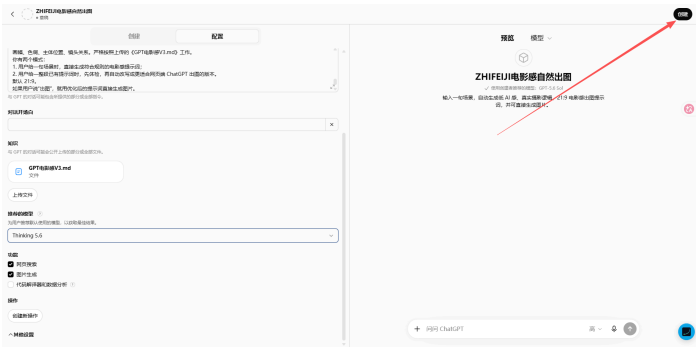

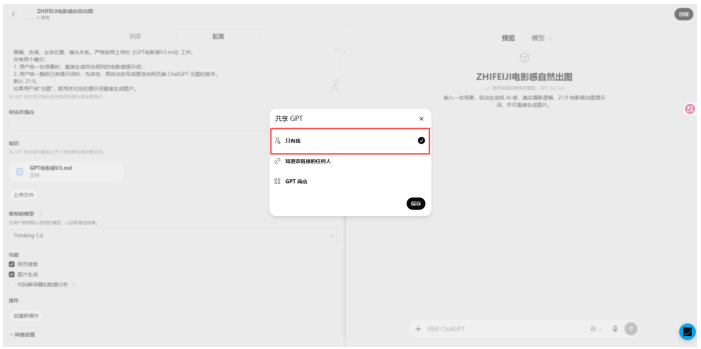

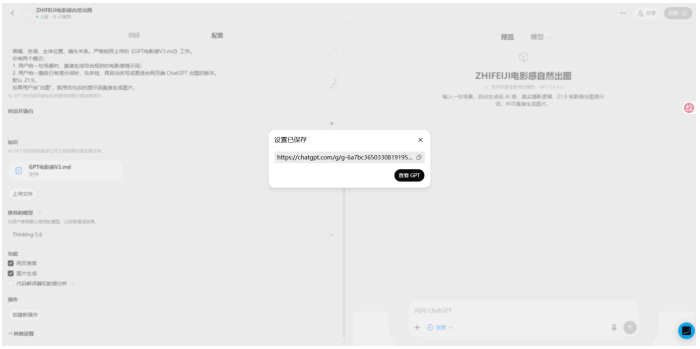

5、推荐的模型选择【Thinking 5.6】

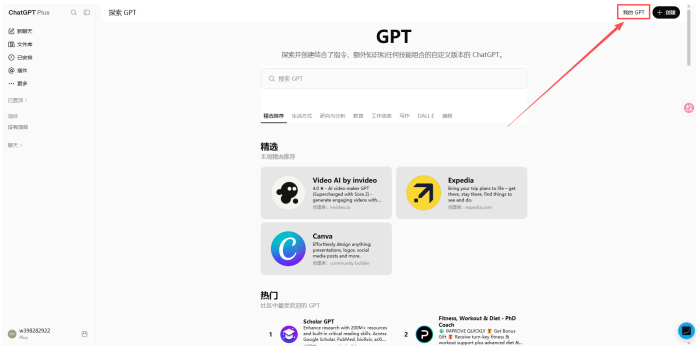

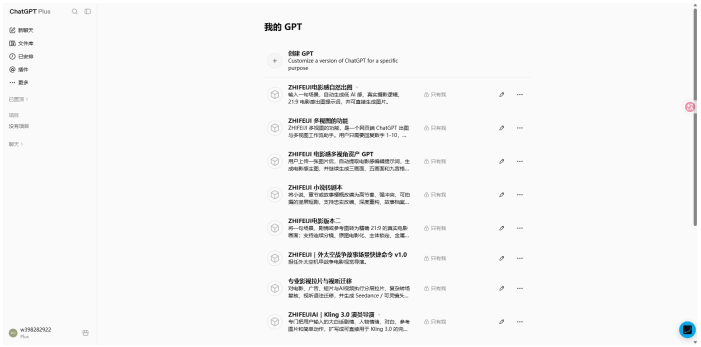

6、所有内容配置完成后，点击右上角的【创建】，共享GPT的方式选择【只有我】，保存即可创建完成

7、之后想要使用这个GPT，可以在新聊天页面，点击左侧【更多】，选择【GPT】，然后点击右上角【我的GPT】即可看到你所有的自定义GPT

📍 拿到新SKILL不会用怎么办?

直接把SKILL丢给GPT或者打开自定义GPT，输入：简单介绍这个SKILL的功能和使用方法。即可得到基本用法。
